

Alan Ranger Academy — Dashboard Inventory

Generated 2026-05-05 from academy-dashboard-squarespace-snippet-v1.html. This document lists every numbered destination wired on /academy/dashboard (plus key hub links), what each area is for, and where content is still missing.

Purpose of the dashboard

The Academy dashboard is the member home for the online photography course. The Modules grid is the structured 60-lesson syllabus (camera, gear, composition, genre, assignments). Paid members unlock Practice Packs and Field Checklists — parallel libraries of field exercises and one-page guides. The Applied Learning Library is a growing set of long-form, scenario-led articles (mostly on the public blog) with per-tile open tracking. RPS Accreditation collects mentoring and distinction-related entry points. Exams, the eBook, calculators, and support tiles sit alongside these libraries so members can learn, practise, assess, and get help from one screen.

Progress and tracking (high level)

Module, practice pack, and checklist opens are stored in Memberstack member JSON under arAcademy.modules.opened (path keys, with titles and timestamps when available). Applied Learning uses arAcademy.appliedLearning.opened and the /api/academy/track-tile-open endpoint (keepalive beacon on click). Placeholder applied tiles use data-applied-placeholder and do not navigate or track.

Counts at a glance

Area	Tiles / Items	Live URLs	Gaps
Modules	60	60	—
Practice Packs	30	30	—
1-Page Field Checklists	35	35	—
Applied Learning Library	37	35	2 placeholders + 0 coming-soon
RPS Accreditation	10	4	6 coming-soon buttons

Modules (60) — course syllabus

15 Key Camera Setting Modules

Gap analysis — where content or wiring is still thin

- Applied Learning: 2 placeholder tiles need published URLs (remove data-applied-placeholder, set href).
- Applied Learning: no disabled coming-soon buttons currently remain.
- RPS block: 6 cubes are coming-soon buttons — need destinations or copy updates.
- UI badges on Applied Learning and RPS still read “Coming Soon” in the header while many Applied tiles are already live — consider updating badge copy for clarity.
- Robo-Ranger and eBook use site-relative paths in some tiles; confirm they resolve correctly on production.
- Photography Style Quiz button is shown/hidden via script — not a static URL in the snippet.
