#	Planned Slug	Working Title
02	uk-wildlife-photography-locations	UK Wildlife Photography: The Best Places by Season
05	seasonal-nature-photography-uk	Seasonal Nature Photography: Autumn, Frost and Mist

Notes for future swaps

When an article goes live, two attributes change on the matching tile: **href="#"** becomes the real blog URL, and **data-applied-placeholder="true"** is removed. The **data-applied-id** is the permanent tracking key so ideally it matches the URL slug from day one. Tracking is automatic via `wireAppliedLearningLinks()`, which posts a keepalive beacon to `/api/academy/track-tile-open` and updates the `arAcademy.appliedLearning.opened` bucket in Memberstack member JSON.
